## AVIATION SECURITY

### SCREENING MANAGEMENT STANDARD OPERATING PROCEDURES

Transportation Security Administration (TSA) personnel and contractors must not implement those medical screening modules in aviation that have been related to aviation screening of passengers, accessible persons, and checked luggage. Nothing in these provisions is intended to create any administrative or procedural right, privilege, or benefit to an employee in any administration, civil, or criminal matter by protection or award, increases or grants. See *United States v. Coxey*, 449 U.S. 741 (1979).

## **Synopsis**

This is the manual which the Transportation Security Administration accidentally released and then withdrew. It is full of information which should be useful to the professional road warrior and worth keeping on your Kindle because when you have a dispute with a TSA employee at an airport it is hard for them to argue with their own manual.

## **Customer Reviews**

Not only is this out of date and a waste of cash, but just having it is illegal (check the notice at the bottom of every page). I'm sure selling it is breaking a whole bunch of laws and I'm sure has some liability as well!

As TSA has indicated, this document is several revisions old and this specific version was never implemented. It was put out to contractors as an example document. While some of the information may be relevant, most of it will have changed, been revised, or become obsolete. As to "...worth keeping on your Kindle because when you have a dispute with a TSA employee at an airport it is

hard for them to argue with their own manual," I wouldn't count on that doing you much good. That would be like trying to argue your way out of a traffic ticket by waving a way-out-of-date version of the vehicle code in the officer's face. I find it hard to believe that .com would even allow this item to be posted, but it may not be for long. Anyone who buys this item is wasting their time and their money.

While this is outdated information, I find it disgusting that someone would risk national security by selling a document that was never meant to be published. Way to think of your pocketbook first. This tempts me to stop purchasing through .
